

Airbrick Flood Defence

CODE G980

Description

The Manthorpe Airbrick Flood Defence is designed to cover the opening of a 9"x3" plastic or clay airbrick, stopping the ingress of water into the property in the event of a flood. The product comes in two parts; the first being a frame which is screwed and sealed to the brickwork around an airbrick using an exterior mastic frame sealant, the second is a removable cover which can be clipped onto the frame in the event of a flood and removed and easily stored once the threat has passed. The cover is bright yellow to remind users to remove it once the flood waters recede to aid in drying out the property, it clips on and off with simple snap fit clips which can be operated with one hand if need be. An o-ring seal in the cover forms the watertight seal between it and the frame preventing the entry of flood waters through the airbrick.

Specification

Colours - Frame	Brown	Buff
	Terracotta	Grey
	Blue/Black	White

(Cover always supplied in yellow)

Packing Details	Sealed in a bag with fitting instructions, 10 units in a box
Weight	0.19kg
Material	Polypropylene
Manufacturing Process	Injection moulded
