

Roll Panel Ventilator

CODE **G502**

Description:

The G502 Roll Panel Ventilator is designed to provide a air gap between the felt and loft insulation into the roof space.

It is suitable for either 400mm, 450mm, or 600mm rafter centres for new build and refurbishment where rafter centres are not consistent or unknown.

Fitting Instructions:

The G502 Roll Panel Ventilator (A) should be rolled out over the full length of the eaves and pulled to adjust to the correct roof truss centres then nailed or stapled to secure in position as shown.

This product should be used in conjunction with other products from the Manthorpe range to provide a complete roof ventilation system.
